Professional Summary

Data Science undergraduate with hands-on experience in data analytics, dashboard development, Python programming, SQL, and AI-driven application development. Experienced in working with structured datasets, performing exploratory data analysis, building visual reports, and developing interactive applications using Streamlit. Interested in transforming data into actionable business insights and building practical data-driven solutions.

Internship Experience

HR Labmentix Pvt. Ltd. – Data Analytics Intern *Aug 2026 – Oct 2026*
Python, Excel, SQL, Power BI, Streamlit

- Worked on multiple data analytics projects involving data preparation, exploratory analysis, visualization, and business reporting.
- Used Python and SQL to process datasets, query structured data, and identify useful patterns.
- Applied Excel for data cleaning and calculations, and developed dashboards and interactive applications using Power BI and Streamlit.

Primeor Solutions – Data Analyst Intern *2026*
Excel, MySQL, Power BI

- Completed a one-month Data Analytics internship focused on data preparation, business reporting, visualization, and analytical insights.
- Used Excel for data cleaning and MySQL for querying structured datasets, calculating metrics, and identifying business patterns.
- Developed interactive Power BI dashboards to monitor KPIs, performance trends, and business metrics.

Projects

AI Powered Desktop Assistant *2026 – Present*
Python, Machine Learning, NLP, Speech Recognition, SQL

- Developing an AI-powered voice assistant using TF-IDF and Logistic Regression for intent classification and natural-language request understanding.
- Implemented workflows for application launching, file management, reminders, information retrieval, and system tasks.
- Integrated conversational AI fallback capabilities to support natural-language queries and user interaction.

E-Commerce Data Analytics & Business Insights *2026*
Microsoft Excel, MySQL, Power BI

- Analyzed 51,271 records covering sales, profit, customers, products, regions, markets, and shipping.
- Prepared and transformed data using Excel and MySQL queries to calculate KPIs and identify business patterns.
- Created an interactive Power BI dashboard covering KPIs, regional performance, category profitability, customers, products, and shipping analysis.

Education

MVJ College of Engineering *2023 – 2027*
Bachelor of Engineering – Computer Science & Engineering (Data Science)
Bengaluru, Karnataka **CGPA: 8.71/10**

Pre-University (12th) *2023*
Percentage: 96%

Secondary School (10th) *2021*
Percentage: 98%

Technical Skills

Programming: Python, SQL
Analytics: Microsoft Excel, Power BI, Pandas, NumPy, Data Cleaning, EDA, Data Visualization
AI and Machine Learning: NLP, TF-IDF, Logistic Regression, Intent Classification
Databases: MySQL, SQLite
Tools: Git, GitHub, VS Code, Jupyter Notebook
Concepts: ETL, Business Intelligence, KPI Reporting, Machine Learning, Exploratory Data Analysis

Certifications

- Python Programming Bootcamp – Udemy
- Oracle SQL Database Certification – Oracle Dev Gym
- Deloitte Australia Data Analytics Virtual Internship – Forage
- Microsoft Excel Certificate – Simplilearn
